Experience

Mpal Solution Pvt. Ltd

Bengaluru, India

Software Developer

07/2025 - Present

Mentorpal.ai is an AI-powered hiring platform for automated recruitment and candidate evaluation

- Solely built end-to-end **UI/UX for 3+ core modules — auth screens, dashboard, and AI Assessment Automation page** — with multi-step animations and fully responsive layouts.
- Engineered a **real-time interview portal with WebRTC peer-to-peer video calling and Socket.IO** collaborative code editor syncing keystrokes live across 2 participants simultaneously.
- Developed **10+ RESTful APIs in Node.js/Express.js** covering auth, user management, dashboard analytics, and interview session flows with **MySQL** as the primary database.
- Integrated Speech-to-Text transcription pipeline — post-interview audio automatically processed for AI-driven candidate assessment and feedback generation.
- Optimized UX across the platform with **lazy loading, shimmer states, pagination, and caching** — delivering a production-grade experience for 100s of users.

nVariant Pvt. Ltd

Bengaluru, India

Software Developer Intern

01/2025 - 06/2025

nVariant is an interactive product demo platform that allows teams to build, share, and analyze self-guided walkthroughs to drive user adoption and capture engagement insights.

- Rebuilt the entire product UI from scratch — including **landing page, auth screens, dashboard, and demo listing (grid/list views)** — with full **backend integration**, delivering a polished, production-ready experience for hundreds of end users.
- Engineered an **interactive demo editor** (similar to a slide editor) featuring a **Konva.js** canvas with **draggable/resizable hotspots, sensitive-text blur, multi-slide navigation**, and a dual-rail editing interface — core to the product's value proposition as a Supademo alternative.
- Implemented a full **demo recording engine that captures and tracks all user click events** on-screen, automatically converting them into editable hotspots for shareable interactive guides.
- Optimized frontend performance across the app using **lazy loading, static data caching, shimmer loading states, and targeted React hook** refactoring — resulting in noticeably faster load times and smoother UX.
- Built and integrated demo embedding and sharing flows, enabling end users to publish and distribute recorded demos externally.

Skill Vertex Pvt. Ltd

Jaipur, India

SDE Intern

06/2024 - 09/2024

SkillVertex is an ed-tech platform that provides students and working professionals with industry-relevant upskilling programs, certifications, and internship opportunities across technical and management domains.

- Built and delivered multiple landing pages and authentication screens with smooth animations and fully responsive layouts across devices.
- Integrated frontend components with backend REST APIs, handling data flow, loading states, and error handling for a production web application.
- Developed reusable React components and gained hands-on experience with real-world codebase structure, Git collaboration, and team-based frontend delivery.

Personal Projects

1. Scalable Secure Bank-Management Backend System [Github](#)

- Developed a secure backend system for banking operations, supporting **account management, fund transfers, and transaction tracking**.
- Implemented **JWT-based authentication with secure login and Forgot/Reset Password flow using Gmail SMTP**.
- **Built RESTful APIs for core functionalities** including account creation, balance inquiry, fund transfer, and transaction history.
- Ensured data consistency using **transactional management to handle concurrent fund transfers** safely.
- Applied **OOP principles, layered architecture, and Dependency Injection** for clean and maintainable code.
- Used **Hibernate ORM with MySQL** to manage entity relationships and write optimized SQL queries.
- Implemented unit testing using JUnit to ensure reliability of business logic.

2. Life Chronicles Social App [Live Github](#)

- Built a **full-stack application**, enabling users to **create profiles, share posts** (images, videos, text).
- Enforced a **secure authentication system using Next-Auth** with **Google OAuth integration**.
- Custom **Gmail SMTP service for Forgot/Reset Password flows**.
- Integrated **Cloudinary for efficient media upload, storage, and delivery**, ensuring optimized image and video rendering.
- Designed a sleek light/dark/system theme using **ShadcnUI and TailwindCSS**, combined with Next.js Fonts Image optimization for enhanced performance.
- Leveraged **Server-Side Rendering (SSR)** to improve initial load time and deliver a seamless UX.
- Used MongoDB as the primary database for storing user data, posts, and media metadata — ensuring fast retrieval and scalability. A dynamic, responsive interface.

Skills

Frontend : HTML5 • CSS3 • JavaScript • Typescript • React.js • Next.js • Redux • API Integration • Shadcn UI • TailwindCSS • Bootstrap.

Backend : Node.js • Express.js • REST API • Socket.io • WebSocket • JWT • Auth Flow • Next-Auth • Java • Hibernate • ORM • SpringBoot.

Database : MySQL • MongoDB • PostgreSQL • Redis.

CS Fundamentals : DBMS • OOPs • Data structure and Algorithms • Computer Networks.

Tools : Github • Docker • Postman • Vercel • Netlify.

AI Tools : Antigravity • Copilot • Codex • Trae • Cursor

Leetcode : 1750+ rating.

Education

Poornima College of Engineering, Jaipur

Jaipur, Rajasthan, India

B-Tech (CSE) 7.2CGPA

10/2021 - 09/2025

Suraj School Rewari, Haryana

Rewari, Haryana, India.

Senior Secondary Education (PCM) **91%, got 92%tile in JEE Mains 2021**

1/2019 - 05/2020
